sys.argv¶ The list of command line arguments passed to a Python script. argv[0] is the script name (it is operating system dependent whether this is a full pathname or not). If the command was executed using the -c command line option to the interpreter, argv[0] is set to the string '-c'. If no script name was passed to the Python interpreter, argv[0] is the empty string.

Python3, but for 3.3, and 3.4 and only those versions, we need other Python versions as a compile time dependency. Nuitka itself is fully compatible with all mentioned versions, Scons as an internally used tool

is not. For these versions, you need a Python2 or Python 3.5 or higher installed as well, but only during the compile time only. That is for use with Scons (which orchestrates the C ...
