INTRODUCTION TO POVERTY ANALYSIS - World Bank

Provides detailed reference material for using SAS/STAT software to perform statistical analyses, including analysis of variance, regression, categorical data analysis, multivariate analysis, survival analysis, psychometric analysis, cluster analysis, nonparametric analysis, mixed-models analysis, and survey data analysis, with numerous examples in addition to syntax and usage information.

SAS/STAT(R) 13.2 User's Guide

Description. Current stable version: 6.0 (released 2017). Previous stable version: 5.0 (released 2015). Original version: 1.0 (released 2009). Main features:

ScriptWarp Systems - WarpPLS

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Nicholas Georgescu-Roegen (born Nicolae Georgescu, 4 February 1906 – 30 October 1994) was a Romanian American mathematician, statistician and economist. He is best known today for his 1971 magnum opus on The Entropy Law and the Economic Process, in which he argued that all natural resources are irreversibly degraded when put to use in economic activity.

Nicholas Georgescu-Roegen - Wikipedia

A Tobin tax, suggested by James Tobin, an economist who won the Nobel Memorial Prize in Economic Sciences, was originally defined as a tax on all spot conversions of one currency into another. Tobin's tax was originally intended to penalize short-term financial round-trip excursions into another currency. By the late 1990s, however, the term Tobin tax was being incorrectly used to apply to all ...
